

COLOR ATLAS and SYNOPSIS of

ELECTROPHYSIOLOGY

EMILE G. DAOUD ■ STEVEN J. KALBFLEISCH

SERIES EDITOR WILLIAM T. ABRAHAM

COLOR ATLAS AND SYNOPSIS OF ELECTROPHYSIOLOGY

NOTICE

Medicine is an ever-changing science. As new research and clinical experience broaden our knowledge, changes in treatment and drug therapy are required. The authors and the publisher of this work have checked with sources believed to be reliable in their efforts to provide information that is complete and generally in accord with the standards accepted at the time of publication. However, in view of the possibility of human error or changes in medical sciences, neither the authors nor the publisher nor any other party who has been involved in the preparation or publication of this work warrants that the information contained herein is in every respect accurate or complete, and they disclaim all responsibility for any errors or omissions or for the results obtained from use of the information contained in this work. Readers are encouraged to confirm the information contained herein with other sources. For example and in particular, readers are advised to check the product information sheet included in the package of each drug they plan to administer to be certain that the information contained in this work is accurate and that changes have not been made in the recommended dose or in the contraindications for administration. This recommendation is of particular importance in connection with new or infrequently used drugs.

COLOR ATLAS AND SYNOPSIS OF ELECTROPHYSIOLOGY

EDITORS

Emile G. Daoud, MD, FACC, FHRS

Professor, Internal Medicine
Section Chief, Cardiac Electrophysiology
Ross Heart Hospital
The Ohio State University Wexner Medical Center
Columbus, Ohio

Steven J. Kalbfleisch, MD, FACC, FHRS

Professor, Internal Medicine
Medical Director, Cardiac Electrophysiology Laboratory
Ross Heart Hospital
The Ohio State University Wexner Medical Center
Columbus, Ohio

SERIES EDITOR

William T. Abraham, MD, FACP, FACC, FAHA, FESC

Professor of Medicine, Physiology, and Cell Biology
Chair of Excellence in Cardiovascular Medicine
Director, Division of Cardiovascular Medicine
Deputy Director, Davis Heart and Lung Research Institute
The Ohio State University
Columbus, Ohio

New York Chicago San Francisco Athens London Madrid Mexico City
Milan New Delhi Singapore Sydney Toronto

Neither McGraw-Hill Education nor its licensors shall be liable to you or anyone else for any inaccuracy, error or omission, regardless of cause, in the work or for any damages resulting therefrom. McGraw-Hill Education has no responsibility for the content of any information accessed through the work. Under no

circumstances shall McGraw-Hill Education and/or its licensors be liable for any indirect, incidental, special, punitive, consequential or similar damages that result from the use of or inability to use the work, even if any of them has been advised of the possibility of such damages. This limitation of liability shall apply to any claim or cause whatsoever whether such claim or cause arises in contract, tort or otherwise.

DEDICATION

We wish to extend our thanks and appreciation to our families for tolerating the hours of training and practice that are required to work in this evolving field. Also, we wish to thank Dr. Fred Morady for his guidance and mentorship during our training and early careers and for still providing insight when needed.

Emile G. Daoud, MD, FACC, FHRS
Steven J. Kalbfleisch, MD, FACC, FHRS

CONTENTS

Contributors

Preface

Acknowledgments

SECTION I

DIAGNOSTIC ELECTROPHYSIOLOGY—MAPPING, IMAGING, AND PACING MANEUVERS

- 1 Ablation of Ventricular Tachycardia Using Carto 3-Dimensional Electroanatomical Mapping System
- 2 Three-Dimensional Electroanatomic Mapping for Ablation of Cardiac Arrhythmias: Ensite Navx and Ensite Array
- 3 Intracardiac Echocardiography for Transseptal Access
- 4 Diagnostic Maneuvers for Supraventricular Tachycardia: VAV, VAAV, PPI, and VA Linking
- 5 Diagnostic Maneuvers for Supraventricular Tachycardia: PVC on His and Para-Hisian Pacing
- 6 Atrial Tachycardia and Cardiac Anatomy: Crista Terminalis

SECTION II

CASE STUDIES IN SUPRAVENTRICULAR TACHYCARDIA

- 7 Typical Atrioventricular Nodal Reentrant Tachycardia
- 8 AV Nodal Reentrant Tachycardia: Atypical
- 9 Atrioventricular Reciprocating Tachycardia: Right-Sided
- 10 AV Reciprocating Tachycardia: Left-Sided
- 11 AV Reciprocating Tachycardia: Epicardial
- 12 Atypical Accessory Pathways
- 13 Wolff-Parkinson-White Syndrome and Sudden Cardiac Death
- 14 Analysis of Challenging Intracardiac Electrograms: Case I—Orthodromic Reciprocating Tachycardia Utilizing a Septal Accessory Pathway versus Atrial Tachycardia or Atrioventricular Nodal Reentrant Tachycardia
- 15 Analysis of Challenging Intracardiac Electrograms: Case II—Focal Versus

Macroreentrant Atrial Tachycardia

16 Supraventricular Tachycardia with Congenital Heart Disease

SECTION III

CASE STUDIES IN VENTRICULAR TACHYCARDIA

- 17 The Evaluation and Management of Nonsustained Ventricular Tachycardia in Patients after Myocardial Infarction
- 18 PVC and Cardiomyopathy
- 19 Ventricular Tachycardia and Cardiac Anatomy: Aortic Cusp
- 20 Mapping and Ablation of Ventricular Tachycardia: Voltage Mapping
- 21 Mapping and Ablation of Ventricular Tachycardia: Local Abnormal Ventricular Activity
- 22 Ablation of Ventricular Tachycardia with Nonischemic Cardiomyopathy
- 23 Ablation of Ventricular Tachycardia in Patients with Left Ventricular Assist Devices
- 24 Remote Magnetic Navigation Ablation of Idiopathic Epicardial Premature Ventricular Complexes
- 25 Bundle Branch Reentrant Ventricular Tachycardia
- 26 Ventricular Tachycardia in Congenital Heart Disease

SECTION IV

PREVENTION OF THROMBOEMBOLISM RELATED TO ATRIAL FIBRILLATION

- 27 Prevention of Thromboembolism in Atrial Fibrillation: Coumadin
- 28 Prevention of Thromboembolism in Atrial Fibrillation: Factor XA and Thrombin Inhibitors

SECTION V

ANTIARRHYTHMIC MEDICAL THERAPY FOR ATRIAL FIBRILLATION

- 29 Class I Antiarrhythmic Medications
- 30 Class III Antiarrhythmic Drugs
- 31 Dronedarone Use for the Treatment of Atrial Fibrillation
- 32 Amiodarone
- 33 Long-Term Monitoring of Antiarrhythmic Drug Therapy

SECTION VI

CATHETER ABLATION TECHNIQUES FOR MANAGING ATRIAL

FIBRILLATION AND ATRIAL FLUTTER

- 34 Pulmonary Vein Initiation and Tachycardia
- 35 Antral Pulmonary Vein Isolation for Atrial Fibrillation
- 36 Approaches to Ablation of Atrial Fibrillation: Fractionated Electrograms
- 37 Approaches to Atrial Fibrillation: Cryoablation
- 38 Technologies for Ablation of Atrial Fibrillation: Duty-Cycle Ablation
- 39 Technologies for Ablation of Atrial Fibrillation: Rotor Mapping
- 40 Technologies for Ablation of Atrial Fibrillation: MRI Analysis of Atrial Tissue Remodeling and Scarring
- 41 Atrial Tachycardia Occurring after Ablation of Atrial Fibrillation
- 42 Pulmonary Vein Stenosis
- 43 Isthmus-Dependent Atrial Flutter
- 44 Incisional Atrial Flutter: Insights on How to Map and Ablate Non-Isthmus-Dependent Atrial Flutters

SECTION VII

SYNCOPE

- 45 Syncope: A Management Strategy
- 46 Vasodepressor Syncope
- 47 Medical and Pacing Therapies for Neurocardiogenic Syncope
- 48 Syncope in the Athlete
- 49 The Implantable Loop Recorder
- 50 Evaluation of Unexplained Sudden Cardiac Death

SECTION VIII

EVALUATION AND MANAGEMENT OF INHERITED ARRHYTHMIAS

- 51 Genetic Testing for Assessment of Inherited Arrhythmias
- 52 Genetic Counseling
- 53 Hypertrophic Cardiomyopathy
- 54 Arrhythmogenic Right Ventricular Dysplasia/Cardiomyopathy (ARVD/C)
- 55 ECG Criteria and Drug Challenge as Diagnosis for Brugada Syndrome
- 56 Catecholaminergic Polymorphic Ventricular Tachycardia

SECTION IX

IMPLANTABLE CARDIAC DEVICES FOR MANAGEMENT OF MALIGNANT VENTRICULAR ARRHYTHMIAS AND TREATMENT OF HEART FAILURE

- 57 Magnetic Resonance Imaging and Cardiac Implantable Electronic Devices
- 58 Technique for Device Implantation: Cephalic Vein
- 59 Technique for Device Implantation: Iliac Vein
- 60 Malignant Ventricular Arrhythmias Occurring Early after Acute Myocardial Infarction and Revascularization
- 61 Prevention of Sudden Death: Chronic Ischemic Cardiomyopathy
- 62 Prevention of Sudden Death: Nonischemic Cardiomyopathy
- 63 Avid Registry: Reversible Causes of Sudden Cardiac Death
- 64 Patient with Ischemic Cardiomyopathy Presents with Sustained Stable Ventricular Tachycardia
- 65 Managing Recurrent ICD Therapies: Medical Therapy
- 66 Managing Recurrent ICD Therapies: Ablation Therapy
- 67 Pause-Dependent Polymorphic Ventricular Tachycardia
- 68 Optimal Programming of ICD to Reduce Unnecessary Therapy
- 69 Pacemaker Programming to Minimize Right Ventricular Pacing
- 70 Cardiac Resynchronization Therapy
- 71 Subcutaneous Defibrillator: Patient Selection and Implantation Technique
- 72 Subcutaneous Defibrillator: Appropriate and Inappropriate Therapies
- 73 Device Troubleshooting: Case I—Diagnosis of SVT versus VT
- 74 Device Troubleshooting: Case II—Lead/Device Noise

Index

CONTRIBUTORS

Nazem Akoum, MD, MS

Comprehensive Arrhythmia Research & Management Center
University of Utah Health Sciences Center
Division of Cardiovascular Medicine
Section of Cardiac Electrophysiology
Salt Lake City, Utah

Sana M. Al-Khatib, MD, MHS

Duke Clinical Research Institute and Department of Medicine
Duke University School of Medicine
Durham, North Carolina

Roi Altit, MD

Fellow, Cardiovascular Diseases
Lankenau Heart Institute
Wynnewood, Pennsylvania
